- **MASTER CLASS A:** Safe and Effective Elderly Care Risk Management: A Guide To Risk and Governance Reset In Elderly Care
- **MASTER CLASS B:** RMIT Lab REMi Non-Invasive Aged Care Resident Monitoring and Alert System (RMIT. Sleepite Pty Ltd, Sleepzee Bedding, Australia)

FORUM OVERVIEW:

The elderly care sector is undergoing a digital transition in the face of the pandemic, yet there are still gaps that prohibit an integrated and connected digital environment.

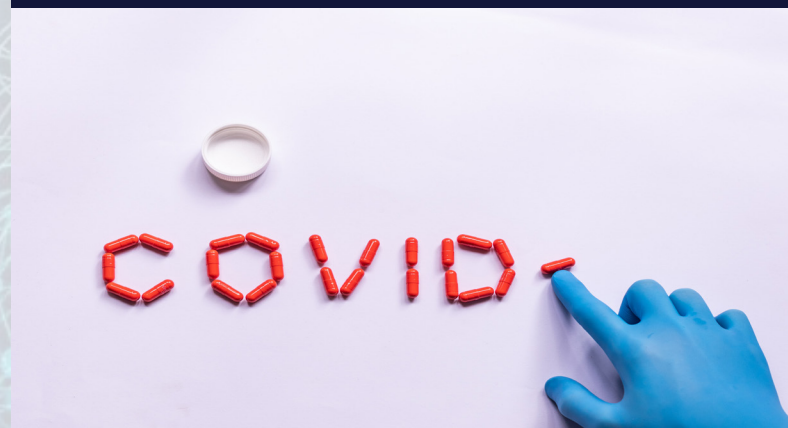

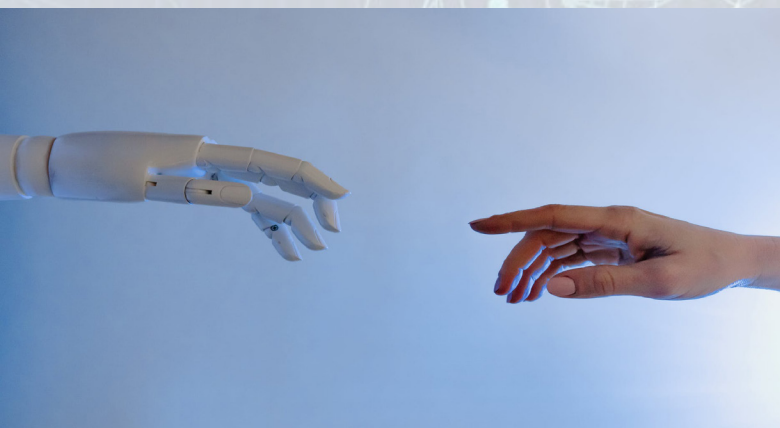

Residential and home care providers face challenges such as decentralized frameworks, an absence of data visibility, and system integration, all of which can have a negative impact on the personal experience of residents.

Now is the time to **prepare, plan, and deploy future-ready systems and technologies.**

Erudite Training Solutions warmly welcomes you to **THE DIGITAL REVOLUTION IN AGED CARE SUMMIT 2022** in The Crowne Melbourne. This is a **hybrid event: in-person and live-streamed**. The summit will address key challenges of improving and rebuilding the aged care system while ensuring high-quality care for the elderly through the use of digital technologies.

Take a virtual site tour of Japan's Future Care Lab: Nursing Care in 2040, explore Smart Homes for the Elderly, and engage in AI-powered Emotion Analysis to gain more insights into how advanced technology can help aged care providers improve operational efficiency and patient outcomes. Recognize the Safe and Effective Elderly Care Risk Management Masterclass.

Joined by **leading aged care experts**, they will share **unique insights and new ideas to help your organization improve palliative, elderly, and dementia care delivery**. A fantastic opportunity to **network with policymakers, leaders of aged care providers, and other key players in the field**.

10:45 - 11:00 **Morning Break**

11:00 - 11:45 Panel Discussion: Asia-Pacific Are We Ready
for the World's Fastest-Aging Region?

The Asia-Pacific region's population is
rapidly aging, with older people expected
to more than double from 535 million in
2015 to 1.3 billion in 2050. By then, one in
four people in the region will be 60 or older,
and one in ten will be 80 or older. As the
region's population ages, inequalities often
exacerbate, causing deep social, economic,
and political implications.

The profound impacts of population aging
on the well-being of all generations are
increasingly recognized by governments in
the region. It will ultimately influence the
2030 Agenda's ambitions to reduce poverty
for all people of all ages and backgrounds.
Notably, ensuring income security for
older people, keeping them healthy, and
ensuring access to healthcare are among
the requirements of "leaving no older
person behind."

Emotional Intelligence For Leaders In Aged Care

09:00 - 12:30

Emotional Intelligence is becoming essential for leaders in general to deliver improved team performance, staff engagement and productivity. Leaders are hired for their intellect and expertise, then fired for the lack of EI.

It has been evident that teams led by emotionally intelligent leaders are 4 times less likely to leave the workplace, that is EI is one of the top 10 skills required for leaders for 2030 (according to Forbes).

Key takeaway:

Transform the care in your facility through:

- Gaining greater awareness of own emotions and those of others
- Tools to manage emotions and become influential and empowering
